ASI recommends students use pods!

Why should you use pods?

- Pods are pre-measured for HE washers, so there is no chance of oversudsing.
- Pods combine detergent and softener, eliminating the need to store two products.
- Pods are spill-proof.

Too much detergent may:

- Cause skin irritation
- Discolor or gray your clothing
- Cause the washer to malfunction

ASI recommends using one pod per load!

*When using pods, do not put them in the soap dispenser drawer. Toss them inside the tub with your dirty clothes.*
